Bachelor of Information Technology

Quchan University of Technology

2015-2019

ReactJS

Maktab Sharif Coding Bootcamp

2022 , (+ 400 Hours)

Languages

English : Upper-Intermediate

Profile

I'm a Front-End Developer working with React and Next.js, focused on deepening my understanding of the JavaScript ecosystem to reach an expert level. I love exploring new tools and technologies—not for the sake of novelty, but because they help me build better, faster, and more reliable applications. I consistently deliver high-quality projects on time and within budget by prioritizing clean code, thoughtful architecture, and close collaboration. I'm passionate about staying current with industry advancements and never stop learning—whether it's through experimenting in side projects or sharing what I've learned with teammates.

Work Experience

Front-End Developer

2023-Present

Entekhab Industrial Group

- **The Entekhab Welfare Admin Panel:** an internal platform for managing employee welfare services, was developed using **Next.js**, **TypeScript**, **Ant Design**, **Tailwind CSS**, and **React Query** for efficient data management and UI performance.
- **The Entekhab Consumption Cooperative Admin Panel:** this panel was built to monitor and coordinate subset stores, manage sales and installments, and guarantors using **Next.js**, **TypeScript**, **AntDesign**, and **REST API** integration to ensure smooth and efficient workflow across all branches.
- **The Entekhab Credit System:** Developed to validate companies fore processing banking transactions and loan applications, **React**, **TypeScript**, **Redux Toolkit**, **Async Thunks**, and **Bootstrap** were used to build a secure, scalable, and user-friendly user interface.
- Collaborated with cross-functional teams to design and implement new features.
